VDI Invests in New Equipment, Increases Capacity

New vacuum metallizer will expand capabilities and allow VDI to better serve customers

LOUISVILLE, Ky. – Jan. 22, 2019 – [VDI](#), a subsidiary of LINTEC Corporation, today announces a significant investment in new equipment for improved manufacturing with the purchase of a new, world-class vacuum metallizer.

The state-of-the-art equipment will allow VDI to better serve customers in the window film, specialty solutions and industrial products markets.

This latest machine addition at VDI is the highest productivity metallizer available and supports material up to 96 inches in width. It has the lowest level of consumption power and raw materials, combined with excellent, consistent coating quality.

“By making this significant investment, we’re continuing our efforts to provide the best quality coatings to our customers,” said Steve Sorrentino, Director of Sales at VDI. “This new vacuum metallizer will increase our capacity, improve customer service and create more opportunities for our company and partners.”

The machine will be fully operational at VDI’s Louisville facility in the second half of 2019. To learn more about VDI’s capabilities, visit <http://www.vdi-llc.com>

About VDI

VDI, a subsidiary of Lintec Corp., is a key industry solutions provider to larger companies – serving as one of the nation’s leading custom roll-to-roll metallizers of evaporative deposition, sputtered deposition and electron-beam deposition coatings. VDI’s primary business and production site is in Louisville, Kentucky. For more information, please visit <http://www.vdi-llc.com>.
