

Prevent Damage From Vandalism on Plastic Surfaces with Graffiti Free Window Film

Graffiti Free Blister Free film is a 6 mil, optically clear product designed specifically for application on polycarbonate (Lexan®), acrylic (Plexiglass®) and other plastics. Polymeric substrates such as these absorb moisture on high humidity days and exude that moisture vapor on low humidity days, leading to the blistering of standard film products. Madico's Blister Free film offers a proprietary adhesive that is not affected by the absorption and release of this moisture and remains intact.

Graffiti Free for plastics allows you to achieve the benefits of UV light rejection, heat reduction, and reduced fading. Graffiti films increase safety and security by holding together fragments should the panel break.

All Madico Graffiti Free films act as a sacrificial barrier to help control vandalism and provide an alternative to replacing damaged glazing. Graffiti Free films are easily installed and replaced so your windows will always look their best.

Most effective in transit systems and other high traffic public areas, Graffiti Free is the solution to keeping vandals at bay. Vandalism costs cities thousands of dollars a year in repair and replacement expenses. By installing Graffiti Free film, windows are protected and financial resources can be used for more important projects.

Benefits of Madico Graffiti Free Blister Free 600:

- Invisible vandalism protection
- Easy installation and removal
- Optically clear and distortion free
- Helps retain broken plastic fragments
- Protects against scratching, spray paint and acid etching

Common Applications

- Skylights
- Product displays
- Schools
- Transit systems
- Boat windows
- Vending machines
- Museums

Wherever there is glass....We can improve it.
